NALEDI KODISANG

Graduate Software Developer | AI & Application Development

Midrand, Gauteng | 081 517 9149 | naledikodisang13@gmail.com | GitHub: Naledi Kodisang | LinkedIn: Naledi Kodisang | Portfolio: https://naledikodisang.github.io/Portfolio-Website/

PROFESSIONAL PROFILE

Curious and analytically driven ICT Application Development graduate with practical experience building, testing, and deploying full-stack web applications that solve real problems. Proficient in Python, JavaScript, Java, Node.js, SQL, REST APIs, and version control using Git and GitHub. Currently completing a SETA-accredited AI Software Development Learnership, strengthening software engineering, testing, debugging, and collaborative delivery skills. I bring strong communication skills, adaptability, and a genuine desire to learn from experienced professionals and contribute meaningfully to real client projects.

PROFESSIONAL EXPERIENCE

AI Software Development Trainee | Ovations Technologies

March 2026 – Present | Industry-based, SETA-accredited AI Software Development Learnership

- Participating in structured sprints, daily stand-ups and Agile ceremonies, delivering software solutions through collaborative, project-based development
- Building, testing and debugging Python-based applications and AI solutions, applying software development best practices from requirements through to deployment
- Managing version control and project tasks using GitHub Projects, maintaining clean commit histories and branching strategies across all deliverables

EDUCATION

Advanced Diploma in ICT Application Development (NQF Level 7)
Walter Sisulu University (Completed 2025)

Diploma in ICT Application Development
Walter Sisulu University (Completed 2024)

National Senior Certificate (Matric)
Zakariyya Park Combined School (Completed 2019)

TECHNICAL SKILLS

Programming & Software Development: Python | Java | JavaScript | HTML5 | CSS3 | Dart | SQL | Object-Oriented Programming (OOP)

Backend & Web Development: Node.js | Express.js | Next.js | TypeScript | REST API Design | JWT Authentication | bcrypt | MVC Architecture | Software Testing & Debugging | Role-Based Access Control

Artificial Intelligence & Data Concepts: AI models & fundamentals | Prompt engineering | OpenAI API | Ethical use of AI | Data validation & integrity

Tools & Technologies: Git & GitHub | GitHub Projects (Agile/Scrum) | Visual Studio Code | Android Studio | Render & Vercel (Cloud Deployment) | MongoDB Atlas | PostgreSQL & Prisma | Microsoft Office (Word, Excel, Outlook)

PROJECTS

Movie Review Web App – Full Stack Web Application
Junior Developer | Personal Project | Live: movie-review-web-app-1.onrender.com | GitHub: Movie_Review-web_app

- Built and deployed a full stack web application using Node.js, Express.js and MongoDB Atlas where users can search, browse and review movies via the TMDB API
- Implemented JWT authentication, bcrypt password hashing and role-based access control — including a dedicated admin dashboard to manage all reviews and users across the platform
- Designed a REST API backend with a structured MVC architecture (controllers, routes, DAO layer) and deployed live on Render with secure environment variable management

GIG Connect – Community Gig Marketplace (Mobile & Web)
Full Stack Developer | Personal Project | Live: gig-connect-web.vercel.app | GitHub: gig-connect-web

- Rebuilt GIG Connect — originally a Flutter mobile app connecting unemployed youth with local gig opportunities — as a full-stack web application using Next.js, TypeScript, Tailwind CSS, and a PostgreSQL database with Prisma ORM
- Implemented JWT-based authentication with bcrypt-hashed passwords, job posting with category filtering, a user dashboard, and in-app messaging tied to specific job listings with owner-only permission checks
- Deployed live on Vercel with a connected Neon PostgreSQL database and environment-based configuration

Job Application Tracker – Web Application
Junior Developer | Personal Project | Live: naledikodisang.github.io/Job-Application-Tracker

- Built and deployed a web application to manage job application workflows with status tracking, clean UI design and structured, maintainable code
- Demonstrated initiative, self-learning and end-to-end delivery by taking the project from concept to live deployment via GitHub Pages independently

CERTIFICATIONS & TRAINING

- IBM AI Fundamentals – AI models, prompt engineering, ethical AI (2026)
- FNB App Academy – Full Stack Development & Corporate Coding Standards (2025)
- Samsung Innovation Campus – Coding and Programming (2024)
- Samsung Innovation Campus – Artificial Intelligence (2024)
- eWay 360° Performance Review System Hackathon – Team-based MVP build using the OpenAI API

CORE COMPETENCIES

Curiosity & Willingness to Learn | Analytical Thinking & Problem Solving | Clear Communication | Effective Teamwork | Adaptability | Personal Motivation | Software Development & Testing | Attention to Detail

COMPLIANCE & AVAILABILITY

South African Citizen, legally eligible to work in South Africa | Recent graduate – Advanced Diploma in ICT Application Development (NQF Level 7) | Available for full-time on-site work in Bramley, Gauteng | Less than two years of professional work experience | Academic transcripts available on request
